Career Summary

Open-source, Nature UI — Frontend developer

I have been collaborating with other developers to develop and maintain a component Library based on ReactJs and Tailwindcss for building web applications with speed:

- Help to Identify needed components.
- Implementing solutions with the best best practices.
- Write unit tests for components.
- Write well documented code.
- Write/update documentations for new & existing components.

Naeme — Full Stack Engineer

JAN 2021 - CURRENT

Naeme is a startup that is focused on handling events from start to finish. I collaborated with designers to build them together with guides from a senior engineer.

Projects

I've got quite some amazing projects you can look into including the above mentioned. Please visit my portfolio website to see my most recent projects <https://successhycenth.vercel.app/#projects>
